

Solar, Storage and Advisory Services

A Program of the New York Power Authority

Simplified turnkey solutions for your transition to solar

NYPA simplifies the complex process of going solar. We offer an end-to-end solution—helping you assess, plan, develop and install solar energy at your site. We can show you how solar can help meet your energy goals, reduce reliance on the energy grid and control costs. Our expertise spans **on-site solar + storage, community solar** and **standalone storage**.

As a New York State authority, we can provide you with the best advice about whether solar will meet your needs. If solar is right for you, we offer turnkey project management—including developer selection, procurement and contracting services, equipment installation and more. NYPA also structures each project to meet your budget needs—and can install solar at no upfront cost—and with no capital investment.

Benefits of Working with NYPA

- **We are your trusted advisor**, bringing impartial expertise to help you understand the best solution for your needs
- **We provide turnkey, end-to-end activation** every step of the way—from planning and contracting to installation. We also connect you with the right solar developer for your project and manage interconnection negotiations
- **We can bring you energy savings** with no upfront cost, and no capital investment
- **We offer expert advice** on policy, so you can meet clean energy mandates and sustainability goals

NYPA—your trusted advisor for solar and storage solutions

Thinking about bringing solar and storage to your site? NYPA is the best partner for you. Our turnkey solution makes the process of going solar simple, by providing objective advice and expert knowledge. NYPA helps customers evaluate all their options to find the best way to reach economic, sustainability and resiliency goals.

Contact us to learn more about how NYPA can help you go solar — beginning with a free solar consultation.
